ON A4 WITH LANDSCAPE ORIENTATION

**PLEASE NOTE THIS IS A GUIDE ONLY*

USE CM TO VERIFY
PRINTOUT ACCURACY

REMINDER
BE SURE TO REMOVE SHOES
WHEN USING THIS CHART
TO DETERMINE YOUR
SIZE & WIDTH.

Place Heel Here

0cm —

Find Your Size

Align your heel with the solid line at the base of the chart. Keeping your weight on your foot, relax your toes. The line that touches your longest toe indicates your size. The shorter lines in between the numbered lines indicate half sizes. Since many people have feet of different sizes, it's important to measure both feet. You should purchase shoes in the larger of your two sizes. To determine if the Width of our shoes is suitable for you, please do the following. When measuring your right foot, place the inside edge of your foot along the solid black line on the left side of the scale. If the outside edge of your foot falls out of the BLUE area on the right hand side of the scale, you may want to consider an alternate size. Repeat the same procedure for your left foot using the opposite side of the scale. Please note that this is a guide only.
